

Stream No. 29 (2 notices)

Millard Creek, Galena Bay.

Width: 20 feet

Depth: 12 inches

About 1,000 feet of stream exposed at half tide.

Falls 15 feet high at high tide line. Fine gravel bottom.

Sept. 27, 1926: About 200 fish spawned here.

1927: No visit. Estimate allowed for.

Stream No. 30 (1 notice)

Duck River, Galena Bay.

Width: 50 feet

Depth: 18 inches

Stream proper is swift water, and it is doubtful if the humps ascend it above high tide line. A little glacier water in it. Spreads out at mouth over a good gravel bar, covering a distance of about 500 feet across, with water from 3 to 5 inches deep. About all the fish spawn there. Is at the head of a lagoon which goes dry at low tide for a distance of about 2,000 feet from high tide line.

Sept. 27, 1926: Enough dead fish in sight to justify an estimate of 20,000 fish.

1927: No visit. Estimate allowed for.

Stream No. 31 (2 notices)

Indian Creek, Galena Bay.

Width: 18 feet

Depth: 8 inches

Accessible 1/4 mile above high tide mouth, after which the water is swift.

Has a fine gravel bottom at mouth and 1/4 mile up,--then rough boulders and bare rock bottom.

Sept. 27, 1926: About 1,000 fish.

1927: No visit. Estimate allowed for.

Stream No. 32 (2 notices)

Valdez Arm.

Width: 12 feet

Depth: 4 inches.

Bottom out from high tide line is a good mixture of coarse and fine gravel. About 800 feet of stream exposed at half tide.

Stream No. 32 (cont'd)

Above high tide line, it is rough rocks, and is accessible only 300 feet.

Sept. 28, 1926: About 500 fish spawned here.

1927: No visit. Estimate allowed for.

Stream No. 33 (2 notices)Jack Bay

Width: 12 feet

Depth: 5 inches

Accessible 1,500 feet above high tide line; half tide 500 feet more.

Sept. 28, 1926: About 1,000 fish spawned here.

1927: No visit. Estimate allowed for.

Stream No. 34 (2 notices)Jack Bay

Width: 12 feet

Depth: 5 inches

Accessible 1,300 feet above high tide line,--then a canyon with rough, blocky rocks and high falls.

Has a coarse gravel bottom,--a little fine with it. At half tide about 400 feet stream exposed from high tide line.

Sept. 28, 1926: 1,000 fish spawned here.

1927: No visit. Estimate allowed for.

Stream No. 35 (2 notices) ~~Head~~ Jack Bay

On the north side a large glacier stream comes in, 60 feet wide and 8 inches deep, with very few signs of fish; on the south side 2 clear-water streams come in, one 20 feet wide and 6 inches deep, the other 5 feet wide and 3 inches deep. They all have fine gravel bottom. Tide backs up about 3,000 feet above the grass banks. Fish not much above there. In the clear water there were 3,500 fish, mostly dead; glacier 500; total 4,000 fish, Sept. 29, 1926.

1927: No visit. Estimate allowed for.
